

National mirroring and participation in the European (ECISS) and International (ISO) work on standards for:

- Forgings for pressure purposes
 - weldable fine grain steels
 - ferritic and martensitic steels with specified elevated temperature properties
 - nickel alloy steels with specified low temperature properties
 - stainless steels
 - creep resistant steels
- Open die steel forgings for general engineering purposes
 - non-alloy steels
 - alloy steels
 - stainless steels
- Non-destructive testing of forgings
