

National mirroring and participation in the European (ECISS) and International (ISO) work on standards for:

- Steel flat products for pressure purposes of
 - Non-alloy and alloy creep-resistant steels
 - weldable fine grain steels (normalized, thermomechanical rolled, quenched and tempered)
 - nickel alloy steels with specified low temperature properties
 - stainless steels
- Steel sheet and strip for welded gas cylinders
- Steels for simple pressure vessels
- Stainless steel bars for pressure purposes
- Hot-rolled weldable steel bars for pressure purposes with specified elevated temperature properties
- Steel and nickel alloys for fasteners with specified elevated and/or low temperature properties

The German standards committee for iron and steel (FES) holds the secretariats ECISS/TC 107 and ISO/TC 17/SC 10 'Steels for pressure purposes'.
